Letter of note. 08-15-2022

In terms of the department of commerce, with my Trademark on my ideals of to be A invention of A product called the "Solar-Rx" that is built with A spoil turbine system in the center of A compartment with that of A casing, of Round device that has "Wool" and "Amber" in A frame that put's the spoil of one side rounded around the spoil is it rapped as it's spin's against A copper frame with one being "Wool" and one being "Amber" that the Amber pick up the Wool as the copper farme pick up on the amber with the Wool as it give 's friction of each of that of Amber and Wool.Say the round cap is the spoil in this picture as a round cooper frame would fit right in the center with the Wool on side Amber on the other, sponged against is the wool to rub with the Amber,the frame gile of the top is seen as A layer of Solar paneling.This ideal to mark with my Trademark is called the "Solar-Rx" that will help bring down cost of gas and can be use as A street industrial item instead of using the one's on the pole's. That when the "Solar-Rx" is in place will cause construccion to pull down all are old frames on the poles which will state more job's to pull down the harmful x-rays that cause of many camerist issues of cancer that the cords that are harmful as well can be put in the ground which brings job's at 81% year 2022.
